

# Tips for Learning @ Home

*We're here with you! While Year 11 & 12 may be returning to school this week, we're still here with you for all students and their parents learning from home. It may be difficult to stay the course while the routine of the household keeps changing. Here are some things you can do to motivate your child during this Learning at Home period.*

## CONVERSATION

Dialogue in discussion in the house about weekly learning tasks and assessment. Encourage conversation about ideas and topics to customize your learning.

## FAMILY FUN TIME

One of the best things about this moment in time has been the opportunity to connect with those around you. Continue to play board games, cook as a family and enjoy some exercise together.

## MAINTAIN SOCIAL DISTANCING

As retail begins to open again, it is important not to become complacent. Social distancing remains important and is the quickest way for things to return to normal. We want you back! You can help by continuing to adhere to social distancing requirements.

## SOCIAL/EMOTIONAL NEEDS

It can be a struggle to stay positive when you are at your computer all day. Contact our support team for ways to promote positive mental health during this time.
