

## The Program

In 2024, Year 7 and 10 students will be commencing participation in our school's iPad program. This program will engage our learners with today's technology and assist them in reaching their full potential in all areas of the curriculum.

At Wilsonton State High School, students are encouraged to strive for excellence through a personalised learning program that integrates the curriculum and fully encompasses the use of Digital Learning Technologies. Students will have access to their own iPad throughout the course of the day, allowing them to locate information quickly and create products that demonstrate their understanding in all areas of the curriculum. The iPad Purchase program allows students to be able to own a personalised iPad and take it home for learning outside of school hours.

## The Curriculum

The teachers of these classes will design all learning programs based on the Australian Curriculum. The students will work within these standards in all areas, including English, Mathematics, Science, Humanities, HPE and The Arts. With this in mind, the use of iPads provides students with enhanced access to research, publishing, problem solving, designing, and presenting of their achievements in a fluid and flexible environment. Additionally, students are provided with consistent opportunities to engage in the General Capabilities of the Australian Curriculum – Information communication technology capacity, critical and creative thinking, and personal and social capability.
